I hope you strongly consider the NAB petition that would ban XM from broadcasting XM instant traffic and weather to local cities across the US. Since I am a XM user I no longer listen to AM or FM stations and feel that I should have the right to weather and traffic on XM just as I would if I was listening to AM or FM. Why should I be punished for adopting, using, enjoying, and paying for a service such as XM just because the NAB is losing listeners because of bad programming and more commercials than music. I hope you reject the NAB's petition 04-160 and stand up the NAB and do not allow them to dictate what I or anyone else is permitted to hear.
